CMOS IC

### DUAL CHANNEL LDO REGULATORS WITH ENABLE FUNCTION

#### DESCRIPTION

The UTC **LR6401** is a low noise and high accuracy LDO voltage regulator which has enable soft start function. Designers can reduce power consumption more easily by applying EN function that can turn off the output of each device and control the in rush current through the soft the start function.

The UTC **LR6401** comes with low design cost and outstanding output stability and its compatibility of working with low ESR ceramic capacitors is undoubted. Besides, and this level of stability is ensured by the perfect transient response and PSRR derived from a large frequency range.
